

Almost 11 years ago I was diagnosed with Age-Related Macular Degeneration and was referred to Mr. Yodaiken. On my first visit he explained to myself, and my daughter, clearly and concisely, what the disease was and how it was treated.

Since then I have attended Mr. Yodaiken's clinic monthly, always receiving the greatest care and attention. On one occasion he opened the clinic on a Bank Holiday to give me my injections. On another occasion he gave me my treatment on a Jewish Festival day - I'm sure this was over and above the call of duty.

I have always had complete confidence in Mr. Yodaiken after he assured me that the

treatment he would give me would almost certainly save some sight. This has proved correct because, until a few months ago I was still able to drive, and I have written this testimonial.

Words cannot express my sincere gratitude for all this doctor has done for me over so many years.

Margaret M. Makin.
